

Water Conservation Ordinance

Covina is committed to conservation. We have year round water use restrictions, regardless of drought conditions.

Click [here to view the restrictions in the Covina Water Conservation Ordinance](#) .

Question: *Why should I worry about conserving water?*

Answer: Water conservation is the least expensive means in which to stretch our current supplies -- either imported or local. Imported water supplies are currently stressed due to environmental conditions in Northern California and along the Colorado River Aqueduct, and local supplies are being used to meet the needs. Local supplies cannot keep up with the demand and the need for imported water generates increased costs and the need for costly infrastructure repairs and additions.

Water Conservation Tips

For conservation information or for available rebates on water saving devices and appliances call 1-888-376-3314 or visit www.bewaterwise.com .

Water Leaks

You may be losing valuable water to leaks. Your new auto-read water meter makes it easy to determine if there is a leak in your home or business in a few steps:

1. Remove the black lid on the solar cell so that light reaches the cell.

2. Check the leak icon.

LEAK INDICATOR
Displays a possible leak:

OFF	No leak indicated.
FLASHING	Intermittent leak indicates that water has been used for at least 50 of the 96 15-minute intervals during a 24-hour period.
ON CONTINUOUSLY	Indicates water use for all 96 15-minute intervals during a 24-hour period.

If there is a leak, click here for information on fixing water leaks quickly here .
